PROFESSIONAL SUMMARY

Computer Science student with hands-on backend development experience gained through a Backend Development Internship at Tapmad. Contributed to Laravel/PHP and JavaScript-based dashboard features, backend integrations, REST APIs, databases, inventory automation, user activity monitoring, and production-oriented UI improvements. Comfortable debugging existing codebases, implementing practical features, and collaborating on real-world development tasks.

PROFESSIONAL EXPERIENCE

Backend Development Intern - Tapmad

Aug 2026 - Sep 2026

- Developed and integrated an Auto Inventory Monitor for inventory preparation, automated assignment workflows, live run progress, and completed/failed/skipped summaries.
- Built an Active Users and User Activity Log interface with user status monitoring, search, role filtering, activity history, date filters, and pagination.
- Improved existing dashboard screens and UI components, including Scheduled Jobs, Promo Code, Sidebar/Profile, and related interface enhancements.
- Integrated frontend interfaces with Laravel backend APIs and worked with PHP, JavaScript, MySQL, Redis/Queues, Git, and GitHub.
- Debugged, tested, and enhanced functionality within an existing production-oriented application while working with the development team.

TECHNICAL SKILLS

Backend	Laravel, PHP, Node.js, Express.js, REST APIs
Frontend	JavaScript, HTML5, CSS3
Databases	MySQL, SQLite
Tools & Workflow	Git, GitHub, Redis/Queues, VS Code, Laragon, XAMPP
Programming	Java, C, C++

SELECTED PROJECTS

Muhalla Mart - Full-Stack Product & Inventory Management System

- Built an Express-based shopping and inventory system with admin/customer interfaces, category and product management, cart/order workflows, dashboard metrics, and image uploads.
- Implemented REST endpoints and SQLite-backed product, category, order, and dashboard functionality.

ShopEase - Laravel Product Management Application

- Built category and product CRUD workflows with image upload, category-based product browsing, Laravel relationships, routing, migrations, and SQLite.

Smart Vehicle Parking System - Java / OOP

- Developed vehicle entry/exit management, parking slot allocation, and automated billing using classes, inheritance, polymorphism, and encapsulation.

EDUCATION

Bachelor of Computer Science - Iqra University
Karachi, Pakistan

Oct 2024 - Present
